Agathis australis NZ kauri: A slow growing native tree that maintains its juvenile, pyramidal form for up to 50 years. Narrow leathery leaves are an attractive Bronze-green colour. Smooth grey bark turning scaly when mature. Adult trees form a straight-trunked stately round headed tree. <i>NARROW - NATIVE - Apx 10m in 30yrs</i>	25L 400L 1000L 1000L 1000L BOXED	1.7m 7.0m 6.5m 7.2m 8.0m 7.0+		Puhinui Puhinui Puhinui Puhinui Puhinui Opaheke

Species:	Bag	Height	Price	Site
Agathis corbassonii Corbasson Kauri: A medium to large sized evergreen tree. Bark tan to red-brown and scaly. Adult leaves linear and willow like 60mm long and 10mm wide. Native to New Caledonia. <i>Apx 40m</i>	45L	2.3m		Puhinui
Agathis macrophylla Pacific Kauri: One of the faster larger growing Kauri Still has mottled scaling bark similar to others. Younger trees conical and narrow but grow wider with age. Strong root systems. <i>NARROW - Apx 40m</i>	45L	3.0m		Puhinui
Agathis robusta Queensland kauri: A large evergreen tree with a similar growth habit to NZ Kauri but with larger leaves and a faster growth rate. Bark flakes off in scales to reveal a smooth trunk. <i>Apx 30m</i>	25L 400L	2.0m 6.5m		Puhinui Both
Agonis flexuosa Willow Myrtle: Graceful, drooping willow-like foliage rich pink in spring. Later in spring, masses of small white flowers cover the tree. Very tolerant to all soils. Easily grown, excellent shade tree. <i>FLOWERS – SHADE – Apx 5 x 4m</i>	45L	2.8m		Puhinui
Agonis flexuosa 'After Dark' PVR A small to medium tree with spectacular foliage which changes with the seasons from claret purple to dark burgundy during winter. Small white flowers in mid spring. Ideal feature tree. <i>FLOWERS – SHADE – Apx 5 x 4m</i>	35L	2.4m		Puhinui
Alberta Magna Natal Flame Tree: Handsome evergreen tree with shiny foliage. Erect clusters of coral Red flowers form at the end of branches in late summer, followed by Small ribbed fruit with large scarlet wings, continuing into winter and Early spring. <i>FLOWERS – Apx 8 x 4m</i>	45L	1.5m		Puhinui
Albizzia julibrissin Silk tree: Grows quickly to provide small screen or shade tree. Stake when young to train into a shade canopy. Rich green, ferny leaves. Flowers during summer on top of leaves, open as rounded fluffy brushes of pink. Tolerates hot dry areas once established. <i>DECIDUOUS - FLOWERS – SHADE - Apx 5m</i>	45L	2.0m		Opaheke
Albizzia julibrissin 'Red Silk' A selected form of the summer flowering "Silk" tree which has bright carmine-red tufted blooms that cover the tree en masse. The foliage is also very pretty and fern like. An ideal shade and specimen tree, easy to grow in a warm sunny position. Hardy. <i>DECIDUOUS - FLOWERS – SHADE - Apx 5m</i>	45L	2.8m		Opaheke

Species:	Bag	Height	Price	Site
Albizzia julibrissin 'Rosea' A selected form of the summer flowering "Silk" tree which has bright pink tufted blooms that cover the tree en masse. The foliage is also very pretty and fern like. An ideal shade and specimen tree, easy to grow in a warm sunny position. Hardy <i>DECIDUOUS - FLOWERS - SHADE - Apx 5m</i>	45L	2.6m		Opaheke
Alectryon excelsa Titoki: Splendid tree with almost black bark. Lush green foliage remains relatively dense as the tree grows. Sprays of rusty, woolly, petal-less flowers occur in early summer and present a curious reddish brown effect. Ideal as a specimen tree, for avenue, or street planting and as a screen. Easy to maintain. <i>BIRDS - NATIVE - SCREEN - SHADE - PLEACHING - Apx 7x4m</i>	8.5L 25L 45L 80L 160L 400L 1000L 2000L	1.3m 1.8m 2.3m 2.6m 3.0m 4.5m 4.0m 5.0-6.0m		Puhinui Puhinui Puhinui Puhinui Puhinui Puhinui Puhinui Puhinui
Alectryon excelsa sub. grandis Three Kings Titoki: Similar to A. excelsa except has larger glossier leaves, and smaller growth habit. Fruit occurs in autumn and seeds are favoured by bird life. Suitable for coastal planting. Evergreen <i>BIRDS - COASTAL - NATIVE - SCREEN - Apx 4m</i>	25L 160L	1.2m 3.0m		Puhinui Puhinui
Alnus cordata Italian Alder: Splendid rapid growing medium to large tree developing to a cone shape. Notable for it's bright green heart shaped 8-12cm smooth leaves with fine toothed margins. Grows in moist or marshy soils. Good for erosion control. <i>DECIDUOUS - SHADE - SHELTER - WET - Apx 12m</i>	400L	4.5m		Opaheke
Alnus glutinosa 'Laciniata' Cut Leaf alder: An attractive and very graceful form with finely cut leaves. Strong grower and upright habit. Suitable for most soils notably damp sites. Yellow catkins in spring. Medium sized tree. <i>DECIDUOUS - SHADE - SHELTER - WET - Apx 8m</i>	400L	6.0m		Opaheke
Alnus jorullensis Evergreen or Mexican alder: A strong fast growing tree with pale, papery grey bark, birch-like serrated foliage and graceful drooping branches. Tolerates damp soil. An excellent shelter tree, specimen that can be clipped. Allow scope if intended for long term plantings. <i>PLEACHING - SHADE - SCREEN - SHELTER - WET - Apx 6m</i>	25L 400L	1.7m 5.0m		Opaheke Puhinui

Species:	Bag	Height	Price	Site
Amelanchier canadensis Shad Bush: A neat erect-growing dense shrub or small tree. Starry white flowers in spring are followed by sweet, blue-black berries which attract birds and can also be cooked and eaten. Vibrant orange-red autumn colours. Tolerates damp conditions. Sun or semi shade. Summer: Green Autumn: Vibrant orange red. <i>BIRDS – DAMP – DECIDUOUS – FLOWERS – WET – Apx 4m</i>	25L	2.3m		Opaheke
Araucaria angustifolia Parana or Brazilian Pine: A large evergreen tree with thick, tough scale like leaves very sharp edges and tip covering most of the tree except for the trunk and older branches. This majestic tree has a distinctive, almost ornamental shape, with a flat-topped crown, and whorls of four to eight branches projecting upwards from the tall, finely scaled trunk. Grows to a very large evergreen tree. <i>CONIFER – Apx 30+m</i>	200L	4.4m		Puhinui
Araucaria bidwilli Bunya Pine: A large tree growing tree, with a straight, rough-barked trunk, and a very distinctive symmetrical, dome-shaped crown. The glossy green leaves are lance-shaped, sharply pointed and about 50mm long. The male cones are narrow, cylindrical structures to about 20 cm long appearing in autumn. Female cones are very large (football sized) and generally mature in summer through to early Autumn. The female cone contains from 50 to 100 large edible "nuts". <i>CONIFER – Apx</i>	25L	1.5m		Puhinui
Araucaria cunninghamii Hoop Pine: At maturity a tall straight tree with long branches and with tufts of branchlets at the ends. Leaves very similar to Norfolk Isl pine but quite stiff and sharp. <i>CONIFER – Apx 40m</i>	25L	1.0m		Puhinui
Araucaria hetrophylla Norfolk pine: Stately, upright growing tree which adds beauty and grace to the landscape. Nice neat pyramidal form. Fairly quick growing. Good container plant. Suitable for coastal sites, withstands strong salt laden winds. Stake until established. <i>COASTAL – CONIFER – Apx 25m</i>	25L 45L 160L	1.8m 2.5m 3.3m		Puhinui Puhinui Puhinui
Archontophoenix cunninghamiana Bangalow palm: Also known as Piccabeen or Seaforthia Palm from Australia. Solitary, slender trunk. Deep green, feathery, arching foliage Flowers followed by red fruit. Likes semi -shade when young, sun when mature. Frost tolerant to -3. Good in containers. <i>PALM – TROPICAL – Apx 10m in 10 yr</i>	25L 60L	1.1m 2.4m		Puhinui Puhinui

Species:	Bag	Height	Price	Site
Aristotelia serrata Wineberry: An small spreading tree. Bark green or red in colour. Small flowers rose-coloured in September to December followed by dark red berries which are attractive to birds and were used by Maori tribes to make wine. Very handsome as a specimen tree. <i>BIRDS – NATIVE – SCREEN - Apx 5 x 3m</i>	25L	1.1m		Puhinui
Banksia ornata Grey An erect that yet somewhat spreading shrub that produces greyish white flower heads late summer into early winter. Trim to shape. <i>COASTAL - FLOWERS APX 1.2 x 1.5m</i>	25L	60cm		Puhinui
Beaucarnea recurvata Pony tail palm: From Mexico, with a solitary trunk to 1.5m, swollen at the base. Strap-like recurring foliage in a "ponytail" spray. Ideal indoor or container plant. Prefers moist -dry soil in full sun to part shade. Tolerant of mild frosts and drought. Slow growing. <i>PALM - Apx 1.5m</i>	25L	60cm		Puhinui
Beilschmedia taraire Tarai re: Handsome NZ Native, stately, straight and erect. Broad dark green leaves with distinctive depressed veins. Trunk has smooth brown bark. Small flowers appear in panicles in spring followed by plum like dark purple fruit in autumn which wood pigeons like. Ok in clay soils. <i>BIRDS – NATIVE - Apx 10m</i>	25L 45L 160L 400L 400L	1.7m 2.2m 2.8m 3.5m 5.0m		Puhinui Puhinui Puhinui Puhinui Puhinui
Betula utilis 'Jermyns' A highly ornamental hybrid with shining white bark that peels to reveal a salmon orange backing. Drooping dark green leaves Long greenish catkins in spring. Summer: Green Autumn: Yellow <i>DECIDUOUS – NARROW - Apx 8 x 5m</i>	45L	3.0m		Opaheke
Betula utilis 'White Spire' Dazzling white stems. A very distinct form of 'Jacquemontii' making a small to medium sized tree with striking white bark and large drooping dark green leaves. A more vigorous and upright fastigate habit. Strikingly white trunk at an early age. Summer: Green Autumn: Yellow <i>DECIDUOUS – NARROW - Apx 6m</i>	45L	2.7m		Opaheke
Betula utilis Jacquemontii Himalayan Birch: Medium sized tree with the famed, dazzling, powdery -white bark and neat erect habit. Dark green leaves and yellow autumn tones. Summer: Dark Green Autumn: Yellow <i>DECIDUOUS –NARROW - Apx 7 x 3m</i>	35L 45L	3.0m 2.5m		Opaheke Opaheke

Species:	Bag	Height	Price	Site

	45L	2.0m		Opaheke
	160L	3.5m		Opaheke
	400L	5.0m		Opaheke
Carpinus betulus 'Fastigiata'				
Upright Hornbeam: A narrow upright form of Carpinus Betulus. Gradually widening with maturity. Oval ribbed green leaves that have good autumn colouring of yellows and oranges eventually turning brown and remaining on the tree for long periods over winter. Very hardy				
<i>DECIDUOUS – NARROW - APX 8m</i>				
	25L	1.7m		Opaheke
	35L	2.5m		Opaheke
	45L	1.7m		Opaheke
	300L	3.3m		Opaheke
	400L	5.0m		Opaheke
Carpodetus serratus				
Graceful tall evergreen with small dark green leaves. Small, White flowers in summer. Prefers a sheltered site. Suits damp situations.				
<i>BIRDS – NATIVE – APX 5 x 3m</i>				
	25L	2.0m		Puhinui
	45L	1.6m		Puhinui
Cedrus atlantica glauca				
Blue atlas cedar: Handsome blue conifer. Gently drooping and upward curving branches from ground clothed with rich, glaucous-blue needles, distinctly frosted. Evergreen.				
<i>CONIFER – Apx 8m</i>				
	25L	1.5m		Puhinui
Cedrus deodara				
Himalayan or Deodar Cedar: A distinctly upright pyramidal tree, with evenly spaced weeping branches. Slender needle like leaves are blue / grey. An excellent specimen tree.				
<i>CONIFER – Apx 8 x 5m</i>				
	25L	70cm		Puhinui

Species:	Bag	Height	Price	Site
Cedrus libani Cedar of Lebanon: A rare slow growing evergreen coniferous tree native to the Mediterranean region. More conical shape when young becoming a large, broad, stately tree. Prized for its high quality timber, oils and resins for thousands of years. <i>CONIFER – Apx 30-40m</i>	25L	1.5m		Puhinui
Cercis canadensis 'Ace Of Hearts' A compact growing tree with a dense dome-shaped top. Heart Shaped Green leaves with clusters small pea-shaped violet flowers on bare branches in spring. Summer: Green Autumn: Yellow <i>DECIDUOUS – FLOWERS - Apx 4.5 x 4.5m</i>	25L 45L	1.4m 2.0m		Opaheke Opaheke
Cercis canadensis Forest pansy A splendid selection with heart shaped, deep reddish-purple large showy leaves. Clusters small pea-shaped rosy purple flowers on bare branches in spring. Vigorous and hardy. Prune to keep tidy. Summer: Purple-Red Autumn: Purple-Red <i>DECIDUOUS – FLOWERS - Apx 3.5m</i>	25L 35L 45L 60L 400L	2.0m 2.2m 2.2m 2.4m 4.5m		Opaheke Opaheke Opaheke Opaheke Opaheke
Cercis canadensis Texas White Texas Whitebud: Forms a small round headed tree with large handsome heart shaped leaves of shining green. They turn bright yellow in autumn. A profusion of pure white pea shaped flowers stud the bare branches in spring. Summer: Green Autumn: Yellow <i>DECIDUOUS – FLOWERS - Apx 4.0m</i>	35L	1.7m		Opaheke
Chamaerops humilis Mediterranean or European Fan Palm: Slow growing clumping palm, which develops many trunks from which erect stems bearing large, rounded leaves deeply cut into linear segments grow. Extremely hardy tolerates frost, coastal and most soil conditions. <i>COASTAL – PALM - Apx 2.0 x 2.5m</i>	35L 80L	70cm 1.0m		Puhinui Puhinui
Chorisia speciosa Floss Silk Tree, Monkey no climb tree: Brazilian tree, with leaves that are divided fanwise into five/seven leaflets. Flowers in autumn have five narrow petals in a mixture of colours like pink, purple or burgundy. <i>DECIDUOUS – FLOWERS - Apx 8 x 5m</i>	1000L	6.0m		Puhinui

Species:	Bag	Height	Price	Site
Cordyline australis				
Cabbage tree: A palm like small tree with long drooping slender leaves. Large heads of scented creamy white flowers in Nov./Dec Will withstand water logging, drought and windy coastal conditions.				
<i>BIRDS - COASTAL - FLOWERS - WET - Apx 6 x 2m</i>				
	25L	1.0m		Opaheke
	45L	1.0m		Opaheke
	160L	1.5m		Puhinui
Cornus 'Eddies White Wonder'				
A popular hybrid forming a large shrub, small tree. A stunning display of large creamy -white flowers in spring followed. by clusters of red berries. Spectacular red and orange foliage in autumn.				
Summer: Green				
Autumn: Red and Orange				
<i>DECIDUOUS - FLOWERS - Apx 4m</i>				
	35L	2.5m		Opaheke
Cornus capitata				
Himalayan Strawberry Tree / Evergreen Dogwood: An evergreen tree growing to Apx 6m tall. Leaves are grey green and fuzzy underneath during summer. Large white blooms during spring summer are followed by late autumn fruit which are attractive to bi rds. These are generally bitter until fruit quite soft. Tolerant of coastal winds.				
<i>BIRDS - COASTAL - FLOWERS - SHADE - Apx 6m</i>				
	25L	1.7m		Opaheke
Cornus controversa				
Giant Dogwood: Multiple tiered horizontal branches with brown shoots are covered in white bloom in summer. Autumn brings blue-black fruit which the bi rds relish and leaves turn rich red-purple.				
Summer: Green				
Autumn: Rich Purple Red				
<i>BIRDS - DECIDUOUS - FLOWERS - Apx 10m</i>				
	25L	2.0m		Opaheke
	45L	2.3m		Opaheke
Cornus florida 'Cherokee Chief'				
The deepest red flowering cornus. Large flat four petalled flowers in spring on bare branches. New spring growth bronzy red turning glossy green through summer. Yellow, scarlet and wine coloured leaves through autumn. Smaller growing.				
Spring: Bronze Red				
Summer: Green				
Autumn: Scarlet				
<i>DECIDUOUS - FLOWERS - Apx 4m</i>				
	25L	1.0m		Opaheke
Corokia 'Geentys Green'				
A Buddleoides selection. A slender growing shrub with rich green foliage and masses of starry yellow flowers early summer followed by dark red berries. Attracts birds. Ideal as a hedge, trims well. Will tolerate dry, coastal, exposed or windy sites. Install drainage in wet areas. Full sun or partial shade. NZ. Native.				
<i>BIRDS - COASTAL - HEDGING - NATIVE - Apx 2.0 x 1.2m</i>				
	6L	40cm		Puhinui
	25L	70cm		Puhinui

Species:	Bag	Height	Price	Site
Corynocarpus laevigatus				
Karakara: A moderately fast growing tree with large glossy green leaves. Fruit are large fleshy drupes appearing in December, small creamy-green flowers in September. Very hardy withstanding strong winds, coastal conditions and drought. Resents water logging. Good as a large screen				
<i>BIRDS - COASTAL - SCREEN - NATIVE - Apx 10 x 5m</i>				
	25L	1.5m		Puhinui
	45L	1.7m		Puhinui
	160L	3.0m		Puhinui
Crataegus laevigata 'Pauls Scarlet'				
Heavily laden branches of double, scarlet red flowers in summer contrast the dark green foliage. Red berries follow in autumn. Suits both dry and damp soils. Medium sized tree or can be used as a trimmed hedgerow.				
Summer: Dark green				
Autumn: Yellow and Orange				
<i>BIRDS - DECIDUOUS - FLOWERS - Apx 5m</i>				
	45L	4.0m		Opaheke
	160L	3.5m		Opaheke
Cryptomeria japonica 'Egmont'				
Japanese cedar: Cutting grown, this form was selected for its form, vigour, evenness, hardiness and tolerance to pest and disease. Quick growing with foliage deep green. Excellent stand alone, as a hedge or shelter belt and can be trimmed very narrow.				
<i>CONIFER - SHELTER - Apx 10+m</i>				
	25L	1.3m		Puhinui
Cunonia Capensis				
Butter Knife Bush: Excellent foliage small tree with reddish stems, bronze new growth and dark green leaves. Showy, scented flowers appear in late summer and are carried in dense, creamy spikes which have a bottlebrush-like appearance. Prefers full sun in well drained moist soil.				
<i>FLOWERS - SCREEN - Apx 4 x 3m</i>				
	45L	2.4m		Puhinui
Cupressus leylandii 'Ovensii'				
Canker resistant variety of Cupressus trims well into an excellent large hedge or shelterbelt.				
<i>COASTAL - CONIFER - SHELTER - Apx 10 x 3m</i>				
	25L	2.2m		Puhinui
Cupressus sempervirens 'Totem'				
Totem Roman Cypress: Selected narrow growing form with bluish-green foliage. Cutting grown for uniform, narrow, columnar shape and even growth rate. Not tolerate wet feet and no manuring.				
<i>COASTAL - CONIFER - NARROW - Apx 15m+</i>				
	9.5L	1.3m		Opaheke
	25L	1.5m		Opaheke
	60L Air Pot	1.5-2.0m		Opaheke
	400L	6.0m		Opaheke
	1000L	6.0m		Puhinui
Cupressus sempervirens 'Swane's Gold'				
Golden Italian Cypress: Attractive narrow growing conifer with golden-yellow foliage. Excellent formal or tub specimen, prefers free draining soil.				
<i>NARROW - CONIFER - Apx 4m</i>				
	25L	70cm		Puhinui

Species:	Bag	Height	Price	Site
Dacrycarpus dacrydioides				
Kahikatea: Usually found growing in swampy areas throughout New Zealand. Juvenile trees have drooping needle like foliage with a bronze tinge. Medium wind tolerance. Eventually grows to be New Zealand's tallest native tree (55m)				
<i>BIRDS – CONIFER – NARROW – NATIVE – WET – Apx 9m in 20 years.</i>				
	25L	1.8m		Both
	45L	2.4m		Opaheke
	160L	3.0m		Opaheke
	400L	6.0m		Both
Dacrydium cupressinum				
Rimu: One of the most widespread of New Zealand forest trees. A slow grower its juvenile form makes a handsome specimen. The leaves are small and awl-shaped and form a weeping habit, bark falls away in heavy scales. One of the most easily recognised large trees in the forest. Prefers cool moist conditions.				
<i>BIRDS – NATIVE – Apx 10+m</i>				
	25L	1.5m		Puhinui
	400L	5.0m		Puhinui
	400L	6.0m		Opaheke
	1000L	5.0m		Puhinui
Dicksonia fibrosa				
Wheki-ponga: NZ native, found in lowland and lower mountain forest. Distinguished by its thick fibrous trunk. While slower growing it does well in average garden conditions				
<i>NATIVE – Apx 6m</i>				
	25L	50cm		Opaheke
Dodonea viscosa				
Ake ake: A small tree with a symmetrical habit. Long glossy light green leaves. Unusual yellow / green papery flower clusters in summer. Will tolerate dry sandy or rocky soils, salt spray, windy areas and drought conditions. Ideal used as a wind or privacy screen and is useful in harsh conditions.				
<i>COASTAL – FLOWERS – HEDGING – NATIVE – Apx 3.5m</i>				
	45L	2.0m		Puhinui
Dodonea viscosa purpurea				
Purple Ake ake: A small tree with a symmetrical habit. Long glossy purple red leaves. Unusual light red / purple papery flower clusters in summer Will tolerate dry sandy or rocky soils, salt spray, windy areas and drought conditions. Ideal used as a wind or privacy screen and is useful in harsh conditions.				
<i>COASTAL – FLOWERS – HEDGING – NATIVE – Apx 3.5m</i>				
	25L	2.0m		Puhinui
Dracaena draco				
Dragon tree: Sword-shaped, smooth, thick, glaucous-green leaves outlined in red if grown in sunshine. Large panicles very small, greenish white flowers. Ideal for tropical effect. Withstands mild frosts and drought.				
<i>Apx 2.5 x 1m</i>				
	25L (Single)	60cm		Puhinui
	400L (Multi Head)	2.0m		Puhinui

Species:	Bag	Height	Price	Site
Dysoxylum spectabile				
Kohekohe: A handsome coastal canopy tree with bold tropical -looking leaves. Naturally found throughout the North Island in coastal forest. Waxy white flowers appear March to June. Fast				
<i>BIRDS – COASTAL - SCREEN – NATIVE – Apx 7m</i>				
	25L	1.8m		Puhinui
	45L	2.2m		Puhinui

Species:	Bag	Height	Price	Site
Ginkgo biloba Maidenhair Tree: A hardy tree of great beauty. Forms a pyramidal tree with symmetrical branches and grey corky bark. Broad fan-like leathery light green leaves resembling sections of a maidenhair fern. Spectacular autumn colouring of bright yellow over a long period. Summer: Light Green Autumn: Bright Yellow <i>DECIDUOUS – Apx 7m</i>	35L	2.7m		Opaheke
Ginkgo biloba 'Fastigiata' A very neat, narrowly erect form excellent for confined tight spaces. Bears usual deep green distinctive maidenhair leaves with golden tones in autumn. Effective in narrow streets and small home gardens. Summer: Light Green Autumn: Bright Yellow <i>DECIDUOUS – NARROW - Apx 7m</i>	25L 45L 60L	1.4m 1.7m 3.0m		Opaheke Opaheke Opaheke
Ginkgo biloba 'Autumn gold' Male clone which does not have any fruits. Excellent autumn colour of bright yellow over a long period. Summer: Light Green Autumn: Bright Yellow <i>DECIDUOUS – Apx 7m</i>	25L 35L 80L	2.4m 2.5m 2.5-3.0m		Opaheke Opaheke Opaheke
Ginkgo biloba 'Saratoga' A selected male clone with a more upright growth habit. Distinctive long leaves hang from the branches giving a weeping effect. A spectacular sight in autumn when green leaves turn golden yellow. Summer: Light Green Autumn: Bright Yellow <i>DECIDUOUS – Apx 7m</i>	25L	1.7m		Opaheke
Gleditsia triacanthos 'Emerald Cascade' Graceful, naturally pendulous branches weep almost to the ground, clothed in finely divided dark emerald green foliage. Turns bright yellow in Autumn. Excellent tree for smaller spaces. Summer: Green Autumn: Bright Yellow <i>DECIDUOUS – SHADE – Apx 3 x 2m</i>	35L 45L	1.5m 1.5m		Puhinui Puhinui
Gleditsia triacanthos 'Ruby lace' Forms a graceful, round headed small tree with finely divided frond like foliage, ruby -red in spring, bronze red in summer intensifying before falling. An excellent cultivar for smaller gardens. Summer: Bronze Red Autumn: Deep Bronze Red <i>DECIDUOUS – SHADE – Apx 5m</i>	25L	2.5m		Opaheke

Species:	Bag	Height	Price	Site
Gleditsia triacanthos 'Skyline' Upright pyramidal form with a compact branching structure. Dense deep green, finely divided foliage. Excellent specimen or shade tree where space is limited. Summer: Dark Green Autumn: Bright Yellow <i>DECIDUOUS – SHADE – Apx 6m</i>	35L	1.8m		Opaheke
Gleditsia triacanthos 'Sunburst' Sunburst Honey Locust: Neatly rounded tree with a attractive branch pattern. Lacy, double pinnate foliage lime-yellow in spring deepening to fresh green in summer, bright yellow in autumn. Successive new growth through summer provides a contrast to the older leaves. Good lawn or street tree. Summer: Fresh Green Autumn: Bright Yellow <i>DECIDUOUS – SHADE – Apx 7m</i>	45L	2.5m		Opaheke
Gordonia axillaris Fried egg tree: A small tree with dark glossy green leaves and flowers similar to Camellias. Large, single, creamy white with yellow stamens from April to September. Plant in full sun to part shade, an excellent small garden species. Slower growing, do not lime. <i>FLOWERS – Apx 5 x 3m</i>	25L 45L	1.0m 1.5m		Puhinui Puhinui
Griselinia littoralis Broadway Mint This fast growing variety can be clipped to form a hedge or allowed to grow on to form a screen. Emerald - green leaves are glossy with a slightly wavy edge. Can withstand coastal conditions strong winds and frosts. <i>COASTAL - HEDGING – NATIVE - Apx 3 x 2m</i>	PB18 45L	90cm 1.2m		Opaheke Opaheke
Griselinia lucida Akapuka: A most impressive plant with rounded, very thick, glossy, green leaves. Wind and salt resistant and grows in sun or shade. Excellent for hedging. Provide good drainage. <i>COASTAL - HEDGING – NATIVE - TROPICAL - Apx 3 x 2m</i>	25L	1.0m		Puhinui
Harphephyllum cafrum Kaffir Plum – Wild Plum: An attractive evergreen tree with pinnate leaves that are glossy, dark green and sickle-shaped. Whitish green fluffy flowers in summer produce tasty red plum-like fruits in autumn which contains a single seed. Useful as an ornamental garden shade tree for attracting birds and butterflies into the garden. <i>BIRDS – FLOWERS – SHADE – Apx 7-10m</i>	25L	1.3m		Puhinui
Hedycarya arborea Pigeonwood: A small tree with attractive dark green foliage and orange fruits which are a favourite food of the native pigeon. Grows in semi-shade and moist conditions. <i>BIRDS – SCREEN – NATIVE – Apx 5 x 4m</i>	25L	1.2m		Puhinui

Species:	Bag	Height	Price	Site
Hoheria populnea Lacebark: Graceful evergreen with slender branches and fresh light green leaves, semi-glossy, veined and sharply toothed. From late summer through to autumn it conceals its foliage with masses of beautiful, starry, snow-white flowers. Excellent rapid screening. NZ Native <i>FLOWERS - SCREEN - NATIVE - Apx 5 x 3m</i>	25L	1.8m		Puhinui
Hovenia dulcis Japanese Raisin Tree: Large growing graceful tree with heart shaped leaves and edible fruit. Fruit appear in clusters of small spherical seed pods that have turned brown or a greyish colour. These more mature stems have a sweeter flavour. <i>Apx 8 x 5m</i>	45L	2.5m		Puhinui
Howea fosteriana Kentia palm: Elegant arching, shiny green fronds and a slender ringed trunk make this one of the most popular palms. Slow steady growth. Will tolerate very low light. Keep moist and partly shaded. Provide drainage in wet conditions. <i>PALM - Apx 6-10m</i>	25L 2000L (2.5 Std) Boxed	1.0m 5.5m 12.0m		Puhinui Puhinui Puhinui
Hymenosporum flavum Australian Frangipani: An outstanding erect, open form flowering tree. Handsome soft green foliage and rich, creamy yellow fragrant flowers during spring and early summer. Trim to keep compact. <i>FLOWERS - NARROW - TROPICAL - Apx 6 x 3m</i>	25L 45L 160L	1.5m 2.6m 3.6m		Puhinui Puhinui Puhinui
Ilex 'Largo' Dark green, oval foliage on an upright bushy shrub. Leaf edges are smooth. Excellent for Hedging or shaping. <i>HEDGING - Apx 3.5m</i>	25L 35L	80-1.0m 1.3-1.6m		Both Both
Jacaranda mimosaeifolia Jacaranda: A sub-tropical tree native to south-central South America. Soft ferny leaves cover the irregular spreading branches. Spectacular summer displays of mauve-blue flowers make it a stand out specimen tree. Evergreen in warm areas. <i>DECIDUOUS - FLOWERS - SHADE - Apx 7 x 5m</i>	25L 45L 160L 400L	1.3m 2.2m 2.8m 4.2m		Puhinui Puhinui Puhinui Puhinui
Juniperus kaizuka Hollywood juniper: A distinctly upward spiralling, twisting juniper of oriental appearance with vivid bright green foliage. Will tolerate drought and coastal conditions. Perfect as focal point in the garden. <i>COASTAL - CONIFER - Apx 4 x 2m</i>	25L	80cm		Puhinui

Species:	Bag	Height	Price	Site
Knightsia excelsa				
Rewarewa: An erect, slender, tapering tree with long green toothed leaves. Very unusual tubular reddish brown flowers in spring are attractive to native bi rds. Ideal tree for smaller gardens or confined spaces. Avoid phosphate fertilizers. Ok in clay soils.				
<i>BIRDS - COASTAL - NARROW - NATIVE - Apx 7 x 3m</i>				
	25L	1.5m		Puhinui
	45L	1.7m		Puhinui

Lophostemon conferta Queensland Box: Erect symmetrical tree upright at first later developing a broad rounded head. Creamy white flowers resembling eucalyptus flowers, during summer are followed by woody capsules similar to gum nuts. Fast growing. (syn. <i>Tristania conferta</i>) <i>Apx 15m</i>	25L 45L	2.3m 3.5m		Puhinui Puhinui
Magnolia (Deciduous) Named after the French Professor of Botany Pierre Magnol, deciduous Magnolias come in a wide range of forms, sizes and flower colours. They are generally vigorous trees with large leathery green leaves and herald from Asia. Evergreens from America. Flowers are mostly borne prior to leaves in spring and they prefer a sheltered spot so the flowers don't become damaged by wind. These days a strong influence on the development of Deciduous Magnolias not only comes from America and Asia but also New Zealand. Most notably from the Jury family from Taranaki and Oswald Blumhardt in Northland.				
Magnolia 'Felix Jury' Jury Hybrid. Smaller growing tree with large leathery green leaves. Huge deep rosy pink / magenta flowers late winter early spring. <i>DECIDUOUS - FLOWERS - Apx 5m</i>	45L (1.8 Std) 400L	2.7m 4.0m		Both Opaheke

<i>DECIDUOUS - FLOWERS - Apx 1.5m</i>				
	25L	50cm		Opaheke
Schefflera actinophylla				
Queensland umbrella: Valued in milder areas for creating tropical effects. Large palmate leaves glossy deep green. Grows in sun or shade, needs protection from frost. Flowers deep red, honey -laden in narrow clusters.				
<i>TROPICAL - Apx</i>				
	400L	4.5m		Puhinui
Schefflera arboricola				
Hawaiian Elf Schefflera: Leaves considerably smaller than <i>S. Actinophylla</i> and general effect denser. Easily pruned to size and form. Yellowish flowers turn bronze when mature. Excellent hedging. Vigorous growing.				
<i>HEDGING - TROPICAL - Apx 4m</i>				
	45L	1.8m		Puhinui
Schefflera digitata				
Patete: Forms a small spreading tree. Deep green leaves with three to nine thin leaflets with serrated margins, delicate greenish flowers in wide panicles from January to March, followed by purple/black berries. Prefers sheltered position in moist soil.				
<i>BIRDS - DAMP - NATIVE - Apx</i>				
	45L	1.5m		Puhinui

Species:	Bag	Height	Price	Site
Sophora chathamica 'Milligold' Weeping Kowhai: A small compact pendulous tree of deep green foliage to the height of its training. In spring the yellow flower display is attractive to nectar seeking Bellbirds and Tui's. Flowers at a young age. <i>BIRDS - FLOWERS - NATIVE - Apx 5.0m</i>	400L	3.0m		Puhinui
Sophora microphylla Fine Leafed Kowhai: A variety of Microphylla which has a more upright habit and very tiny leaves with a brown tomentum on the stems. A magnificent sight in spring when in full bloom. Flowers are rich yellow. Very hardy, ideal for background planting. <i>BIRDS - FLOWERS - NATIVE - Apx 5m</i>	25L 45L 400L	1.5m 1.8-2.0m 4.0m		Both Opaheke Opaheke
Sophora tetraptera NZ Kowhai: Slightly larger growing tree than S. microphylla with leaves also larger at 8-16cm and does not have the tangled juvenile growth. Golden yellow flowers in spring in 4-10 flowered racemes commence earlier than Microphylla. A more open airy habit A spectacular sight in full bloom. Attracts native birds. <i>BIRDS - FLOWERS - NATIVE - Apx 7.0m</i>	25L 45L 160L	1.7m 1.7m 2.8m		Opaheke Both Both
Sorbus aria 'Lutescens' Silver Whitebeam: This small compact tree is noted for the 12cm long, bold leathery leaves that have the upper surfaces covered in dense cream and white woolly hairs during spring and early summer. White flowers in spring are followed by orange red fruit in autumn. Summer: Green Silver Grey Autumn: Yellow <i>BIRDS - DECIDUOUS - FLOWERS - SHADE - Apx 4 x 2m</i>	35L 45L 80L	2.3m 2.3m 3.0m		Opaheke Puhinui Opaheke
Stenocarpus sinuatus Queensland Firewheel tree: A robust handsome evergreen tree with deeply lobed large green leaves. Curious, red wheel-like flowers in early winter. They may take years to flower, but worth the wait. Tolerant of poor soil, wind, and low light. Australian native <i>FLOWERS - TROPICAL - Apx 7 x 5m</i>	45L 80L 160L	2.5m 2.7m 3.5m		Puhinui Puhinui Puhinui
Streblus banksii Large-leaved milk tree: A smaller coastal tree with a rounded crown found in both North and South Islands. Dark green leaves alternate along a slightly zig-zag stem. Flowers in small clusters on spikes Aug-Oct followed by red berries in summer. Prefers deep fertile soil. Endemic to NZ <i>COASTAL - NATIVE - SCREEN - SHADE - Apx 5m</i>	160L	2.0m		Puhinui
Strelitzia nicolai Giant Bird of Paradise: Grown more for the dramatic size and tropical look of the banana style leaves. Flowers during summer, are an almost black colour with white with light blue petals. Forms a huge clump. <i>COASTAL - FLOWERS - TROPICAL - Apx 6 x 3m</i>	25L	80cm		Puhinui

Species:	Bag	Height	Price	Site
Strelitzia reginae Bird of paradise: Forms large greyish green leaves. Flowers held on long stems are made up of orange, purple and white. The interesting structure resembles colourful tropical birds. Valuable for garden display and indoor decoration. <i>COASTAL – FLOWERS – TROPICAL – Apx 1.5 x 1.5m</i>	25L	40cm		Puhinui
Sygarus romanzoffiana Queen Palm: Extremely hardy and grows quite tall in time. The fronds are upright, but curving over at the tips, dark green and feathery. Grey trunk. Fast grower Spray of cream flowers, orange fruits. <i>PALM – Apx 15+m</i>	25L 45L 80L 160L 400L	1.5m 2.3m 2.5m 3.0m 5.0m		Puhinui Puhinui Puhinui Puhinui Puhinui
Syzygium Australe Australian Rose Apple. Bush Cherry: A fast growing graceful tree with dark green leaves to 8cm long on pendulous branches. Young growth coppery brown An abundance of white myrtle-like flowers with yellow stamens are followed by rosy purple berries. Excellent trimmed for hedging <i>HEDGING – PLEACHING – SCREEN – Apx 7 x 5m</i>	45L (1.0 std)	1.8m		Puhinui
Taxodium distichum Swamp Cypress: Forms a large tree with fibrous, reddish-brown bark. Young growth soft green changing to brownish green to rich golden brown before falling. Tolerant of wet feet. Good for planting by streams, ponds. Summer: Green Autumn: Gold, Orange Brown <i>DECIDUOUS – WET – Apx 15m</i>	25L 45L 80L 400L	1.7m 2.5-3.0 2.7m 5.0m		Opaheke Opaheke Opaheke Opaheke
Thuja occidentalis 'Smaragd' An elegant, slow growing specimen tree that has a compact, conical, habit. Dense, glossy, bright green foliage held on vertical branches will withstand humid weather. Prefers full sun or part shade in well drained soil. Suitable for containers. <i>COASTAL - CONIFER – NARROW - Apx 4m</i>	25L 45L 300L	80cm 1.3m 2.7m		Puhinui Puhinui Puhinui
Tilia Cordata Small leafed Lime: Forms a dense pyramidal tree with masses of pale yellow, sweetly scented flowers in summer which are attractive to bees. Pliable branches can be trained along wires for espaliering or can be trained as a hedge. Green leaves through summer, yellow in autumn Summer: Green Autumn: Yellow <i>DECIDUOUS – SHADE - Apx 15m</i>	25L	80 -1.0m		Opaheke

Species:	Bag	Height	Price	Site
Tilia platyphyllos				
Large Leafed Lime: A broadly-columnar tree. Great shade tree with leaves turning yellow in autumn. Small, fragrant flowers attractive to bees. Popular larger growing avenue tree.				
Summer: Green				
Autumn: Yellow				
<i>DECIDUOUS – Apx 20m</i>				
	25L	1.2m		Opaheke
	35L	2.0m		Opaheke
	45L	2.4m		Opaheke

Toona australis				
Australian Red Cedar: A majestic deciduous tree with a spreading crown of glossy green pinnate leaves which open and attractive bronzy red. Small fragrant white or pink flowers in spring. Use in Australia as a timber tree.(syns. Cedrela australis)				
Summer: Green				
Autumn: Pink				
<i>DECIDUOUS – SHADE - Apx 20+m</i>				
	160L	2.7m		Puhinui
	1000L	4.5m		Puhinui

Trachycarpus fortunei				
Windmill palm: Grows rapidly in mild climates forming a dark trunk. Fan shaped leaves. Hardy under most conditions. Useful for feature planting in gardens or containers.				
<i>COASTAL – PALM – Apx 10-15m</i>				
	25L	80cm		Puhinui
	60L	1.2m		Puhinui
	160L	2.0m		Puhinui
	400L	3.0m		Puhinui

Tristaniopsis laurina				
Water Gum or Kanooka: A medium sized compact tree with dark glossy green leaves and small fragrant flowers in clusters during summer. Prefers moist well drained soils in full sun. Ideal for street planting, lawn specimens and as a shade tree. (syn. Tristania laurina)				
<i>SCREEN – SHADE - Apx 5 x 3m</i>				
	45L	2.7m		Puhinui
	160L	2.7m		Puhinui

Tupidanthus calypttratus				
Mallet Flower: A smaller growing evergreen tree very similar to the Queensland Umbrella Tree but more bushy. Large tropical leaves are palmate glossy deep green. Flowers green in groups.				
<i>TROPICAL – Apx 6m</i>				
	25L	1.8m		Puhinui
	35L	1.8m		Puhinui

Viburnum tinus 'Eve Price'				
Evergreen shrub with bushy compact habit and dark green foliage covered with carmine buds opening to pink-tinged white flowers in winter. Prefers a moist well drained soil in full sun to light shade Wind hardy. Excellent for mass planting or hedging.				
<i>HEDGING – Apx 2m</i>				
	25L	60cm		Puhinui

Species:	Bag	Height	Price	Site
Vitex lucens				
Puriri: If there is the space and a tree is wanted to attract birds year round a Puriri is a good choice. Forms a large spreading tree with dark glossy green leaves. Pink flowers are produced almost year round & these provide the nectar which attracts bell birds & Tui. Flowers are followed by large pinkish/red berries. Protect from frost when young.				
<i>BIRDS - COASTAL - DAMP - NATIVE - SHADE - Apx 15m+</i>				
	25L	1.3m		Puhinui

	160L	2.5-3.0m		Puhinui
	400L	3.0m		Puhinui
	1000L	5.0m		Puhinui

Washingtonia robusta				
Cotton palm: Very hardy and fast growing. Fan foliage is a nice green with cotton threads. Leaf stems are thorny. Perhaps the most attractive of the fan palms, but needs space to develop. Suitable for coastal Moderately Frost hardy.				
<i>PALM - Apx 10-15m</i>				
	25L	70cm		Puhinui
	60L	1.0m		Puhinui
	160L	1.5m		Puhinui
	400L (2.0 Std)	4.0m		Puhinui

Waterhousia floribunda				
Grows to a fine shrubby tree with a weeping habit. Leaves are long, wavy edged and thin. Generally green but new growth consists of lighter greens yellows and salmon colours. White flowers Nov-Jan followed by rich pink berries. Ideal for screening, trimmed as a hedge or as an "umbrell a" specimen. Hardy and adaptable in most situations				
<i>HEDGING - SCREEN - Apx 8 x 4m</i>				
	25L 1.3m			Puhinui
	45L	1.6m		Puhinui

Specimen Fruit, Nut & Citrus Trees

Species:	Bag	Height	Price	Site
----------	-----	--------	-------	------

APPLE (*Malus domestica*)

For maximum cropping, it is better that apples cross pollinate with other apples flowering at the same time. Many varieties set more fruit than they can successfully carry and it is not uncommon to see many of the immature fruit fall in early December. Sometimes hand thinning is necessary to avoid overstressing the tree, which may result in a poor crop the following year. However this should not be done until mid -December when the natural fall is complete.

Apple Root Stock:

M26	Very Dwarf tree, Under 3.0m
M.9	Dwarf tree, To Apx 3.0m, Suits well drained fertile soils. Requires support system: post or wires
MM106	Semi dwarf tree, To Apx 4.5m. Good on most soils except poorly drained soils
MM 793	Larger tree, To Apx 6.0m. Better suited to difficult soils (heavy or clay)
Northern Spy	Semi dwarf tree. To Apx 3-5m. Wetter ground and Clay. Resistance to woolly aphids.

Harvest Season (ApX):

EARLY = Jan – Feb. MID = Feb – March. LATE = April – May

Apple Ballarat

A heritage Apple from Australia dating back to the early 1900's. Large fruit are green with a red blush and cream flesh. Good cooking apple with a long storage life.

HARVEST – APR-MAY - HERITAGE

45L

2.5m

Puhinui

Apple Belle de Boskoop

A large orange-red russeted heritage apple. Very popular as a cooking and eating apple. Firm, crisp with full tart flavour. Gets sweeter with storage over 3-4 months. Forms an open wide spreading weeping tree. Spur bearing, mid to late season.

HARVEST – APR-MAY - HERITAGE – DISEASE RESISTANT

45L

1.6m

Puhinui

Apple Braeburn

Origin in N.Z in 1952 as a chance seedling. Yellowish green skin with a blood red striped pattern. Crisp, juicy, flesh and superb sweet-tart flavour. Cooking or fresh. Long life storage.

Late season apple, Apr - May

HARVEST – APR-MAY – SELF FERTILE

----------	-----	--------	-------	------

AVOCADO (*Persea americana*)

A handsome subtropical evergreen tree with large emerald green leaves that forms a thick canopy. Requires free draining deep soil and protection from frosts and cold winds. All varieties are self-fertile though the trees will produce more and better fruit if cross pollinated. Flowers September to December and generally require a few years to mature before fruiting. Grows Apx 6 x 4m.

Avocado Bacon

Medium sized oval fruit with smooth shiny green skin. Easy to peel with a medium to large seed. Yellow green flesh with light flavour smooth and silky. Skin darkens slightly when ripe. Early constant cropper. Self-fertile but will produce better if cross pollinated with another variety.

HARVEST LATE AUTUMN TO SPRING – Apx 5 x 4m

25L Bucket	70cm	Puhinui
35L	1.5m	Puhinui

Avocado Fuerte

Pear shaped fruit with a thin, smooth green, non-shiny skin. Skin remains green as fruit ripens. All self-fertile but will produce better if cross pollinated with another variety.

HARVEST AUGUST TO OCT – Apx 6 x 4m

25L Bucket	80cm	Puhinui
35L Bucket	1.5m	Puhinui

Avocado Hass

Produces medium sized fruit with pebbly thick skin, which darkens when ripe. Smooth texture with high oil content and very nutty rich taste. Fruit from November to March. The most commonly grown variety in the world. Self-fertile but will produce better if cross pollinated with another variety.

HARVEST NOV TO MARCH – Apx 6 x 4m

35L	1.3m	Puhinui
-----	------	---------

Avocado Reed

Large round, 'cannon ball' shaped smooth -skinned fruit with smooth texture and nutty flavour. Fruit remains green when ripe. Self-fertile but produce better if cross pollinated with another variety

HARVEST FEB TO APR – Apx 6 x 4m

25L Bucket	1.0m	Puhinui
------------	------	---------

Cherry Lapins

Large sized, dark red fruit with a mild flavour. Firm juicy flesh. Suitable for warmer climates. To keep blossoms protected, plant in a sheltered site out of harsh frosts and strong winds.

Mid to late fruiting. Self-fertile.

45L	2.0m	Puhinui
-----	------	---------

Chestnut 1005

Large to very large red brown nuts that fall free of the burr. Popular variety for commercial plantings crops early in season and heavily. Strong upright larger growing tree.

45L	2.0m	Puhinui
-----	------	---------

Chestnut sweet

A hardy large, quick growing, broad crowned tree with large dark green oval leaves turning deep gold in autumn. Produces sweet tasting edible chestnuts during summer. (Deciduous. Apx 20m)

25L	1.6m	Puhinui
45L	1.8m	Puhinui

Species:	Bag	Height	Price	Site
FEIJOA (<i>Acca sellowiana</i>)				
One of the hardiest of the subtropical fruits, growing in most soils and tolerating several degrees of frost. Feijoas are commonly available as seedlings, but plants grown from cuttings or grafted specimens are more reliable. The fruit ripens between April and June and when mature will fall off the tree at a touch. The fruit are best left for two to three days before eating. Generally require another to cross pollinate.				
Fejoa Mammoth				
NZ Bred Fruit. Large round to oval fruit thick wrinkled skin. Sweet aromatic flavour with slightly gritty soft juicy pulp. <i>HARVEST MAY - JUNE</i>				
	25L	1.2m		Puhinui
Fejoa Plantlife Selection				
A New Zealand selection similar to Mammoth. <i>HARVEST APRIL - MAY</i>				
	25L	1.4m		Puhinui
Fejoa Unique				
Self-Fertile Medium sized fruit, smooth skinned, Juicy flavour. <i>HARVEST MARCH</i>				
	25L	1.4m		Puhinui
	45L	1.5m		Puhinui
FIG (<i>Ficus Carica</i>)				
As well as the fruit, Fig trees have large bold tropical leaves and matured gnarled and twisted branches. Require a sunny sheltered spot and frost free. They thrive on abundant moisture and do particularly well in the milder climates of New Zealand, where they develop into a large fruiting tree. They require minimal pruning and only moderate fertilization. Figs are relatively free of pests and disease but birds are often a problem. Netting the tree for protection is often required when fruit ripens. <i>HARVEST: February - April. GROWS to Apx 5 x 5m</i>				
Fig Brown Turkey				
Large bold tropical leaves with gnarled and twisted branches. Requires a sunny, sheltered, frost free spot. Thrives on abundant Moisture. Well known hardy selection with large crops of green figs With distinguishing brown tinge, white to amber flesh <i>HARVEST: FEB-APRIL - APX 5 x 5m</i>				
	25L	1.3m		Puhinui
Fig Brunoro Black				
Large bold tropical leaves with gnarled and twisted branches. Requires a sunny, sheltered, frost free spot. Thrives on abundant Moisture. A compact smaller growing tree. Known as the strawberry fig due to its sweet jam like flavour and ruby pink flesh. Good fresh or dried, later season fruiting. <i>HARVEST: FEB-APRIL - APX 5 x 5m</i>				
	25L	1.3m		Puhinui
Fig French Sugar				
Large bold tropical leaves with gnarled and twisted branches. Requires a sunny, sheltered, frost free spot. Thrives on abundant Moisture. Large fruit with dark green skin and succulent pale pink flesh. Heavy cropper. Later fruiting. <i>HARVEST: APRIL - APX 5 x 5m</i>				
	35L	2.2m		Puhinui

Species:	Bag	Height	Price	Site
Fig Ventura Large bold tropical leaves with gnarled and twisted branches. Requires a sunny, sheltered, frost free spot. Thrives on abundant Moisture. A compact smaller growing tree. Known as the strawberry fig due to its sweet jam like flavour and ruby pink flesh. Good fresh or dried, later season fruiting. <i>HARVEST: FEB-APRIL - APX 5 x 5m</i>	25L	1.2m		Puhinui
Hazelnut White Heart New Zeal and's most popular hazelnut grown mainly for processing. Good yield on medium sized nuts of excellent flavour. Pollinators include Merille de Bollwiller and Alexandra.	25L	1.0m		Puhinui
LOQUAT (Eriobotrya japonica) Very attractive compact tree with large dull rich green leaves, long and pointed, thick, stiff, waxy and shiny above with a felt underneath. Clusters of woolly white perfumed flowers in winter followed by yellow round oval juicy fruit November to December. Fairly wind tolerant and salt tolerant.				
Loquat Kaitaia Gold Fruit are best picked when a deep golden yellow, to maximize taste and sweetness. Fairly wind tolerant and salt tolerant. Excellent fresh sweeter flavour. The flesh is firm and has apricot/plum flavour.	25L	1.5m		Puhinui
Loquat Thames Pride Once fruit are a deep golden yellow, maximum taste and sweetness is obtained. Fairly wind tolerant and salt tolerant. Excellent flavour with a good balance between acid and sweetness.	25L	1.5m		Puhinui
Macadamia Beaumont Integri folia / Tetraphylla variety. Perfumed pink flowers. Self -fertile but better with another as a pollinator. Nuts, which hang in clusters, need to be picked as these ones do not drop. Texture and flavour very good. NZ's most commonly commercially grown variety. <i>HARVEST: Aug-Sept Apx 6-8m</i>	160L	3.0m		Puhinui
Malus Jack Humm Strong growing tree bearing apple-blossom type blooms in spring followed by clusters of large bright crimson fruit flushed orange and yellow. Ideal for garden borders or as stand-alone specimen <i>DECIDUOUS - FLOWERS - Apx 3 x 2m</i>	45L	2.2m		Puhinui
Medlar Highly picturesque smaller spreading tree that has been grown since ancient times for its edible, distinctive brown fruit. Fruit needs to be very to over ripe or long stored. Very Hardy. Good autumn tones. <i>APX 6-8m</i>	25L 35L	2.0m 2.3m		Puhinui Puhinui

Species:	Bag	Height	Price	Site
NECTARINE (<i>Prunus persica</i> var. <i>nectarina</i>)				
Nectarines are amongst the most delicious fruit to grow in a home garden, as the fruit tastes so much better when fully tree ripened! All varieties are best with a basic disease prevention program to ensure good tree health and productive fruiting. All varieties are self -fertile.				
Nectarine Early Red 2				
Very early to fruit. Yellow flesh and red blushed skin. Good eating and good fruit size. Vigorous. Freestone.				
<i>HARVEST JAN - FREESTONE - SELF FERTILE</i>				
	45L	1.7m		Puhinui
Nectarine Fantasia				
Large bright red over yellow skin. Juicy, sweet, firm yellow flesh, Freestone. Good Cropper. Ripens February.				
<i>HARVEST FEB - FREESTONE - SELF FERTILE</i>				
	45L	1.5m		Puhinui
Nectarine Red Gold				
Reliable quality nectarine with consistent flavour. Skin is yellow blushed red. More resistant to "curly leaf".				
<i>HARVEST FEB MAR - FREESTONE - SELF FERTILE</i>				
	45L	1.6m		Puhinui
Nectarine Snow Queen				
Pale skin flushed red and delicious creamy white flesh				
<i>HARVEST JAN - FREESTONE - SELF FERTILE</i>				
	45L	2.3m		Puhinui
PEACH (<i>Prunus persica</i>)				
Native to North West China, Peaches produce sweet, juicy fruits. Trees are deciduous and all varieties are best with a basic disease prevention program to ensure good tree health and productive fruiting. All varieties are self-fertile.				
Peach Root Stock				
GQ = Golden Queen				
Peach Blackboy				
A novelty peach with port wine coloured skin and a dark red flesh fading internally to white. Popular fresh or bottled.				
<i>HARVEST MAR - SELF FERTILE - Apx 3-6m</i>				
	45L	2.0m		Puhinui
Peach Gordons Glory				
Clingstone peach with similar flesh and flavour to Golden Queen Chosen for its resistance to leaf curl.				
<i>HARVEST MAR-APR - CLINGSTONE - SELF FERTILE</i>				
	45L	2.5m		Puhinui
Peach Healys Peacharine				
A nectarine peach cross. Medium to large, sweet, juicy firm fruit with smooth yellow skin. Excellent eating quality and great for bottling. Best in warm protected site.				
<i>HARVEST MAR-APR - SELF-FERTILE</i>				
	45L	2.4m		Puhinui

Species:	Bag	Height	Price	Site
Peach Paragon Heritage type. A very popular peach in NZ which is widely grown Commercially and by the home gardener. Sweet yellow juicy flesh, with a yellow blushed red skin. Regular heavy cropper. <i>HARVEST FEB - CLINGSTONE - SELF FERTILE</i>	45L	2.0m		Puhinui
Peach Springcrest Medium sized fruit with yellow flesh. Skin has a strong red blush on yellow background. Excellent dessert fruit. Reliable cropper. <i>HARVEST JAN-FEB - FREESTONE - SELF FERTILE</i>	45L	2.6m		Puhinui
Peach Yumyong Very large late season peach, with firm white flesh that is crisp and crunchy, with a sweet sub acid flavour. Skin is burnished red over cream colour. Originates from Korea. Very popular. <i>HARVEST MAR - FREESTONE - DISEASE RESISTANT - SELF FERTILE</i>	45L	2.3m		Puhinui
PEAR (Pyrus communis) European Pears provide some of the best fruit in the world. They generally require less care than apples and are an excellent choice for the home garden. They are one of the easiest and most traditional fruits for training into espalier form. As most pears need cross pollination, the planting of more than one variety, or a double a grafted tree is recommended. Seasons: EARLY = Feb - Mar. MID = March -April. LATE = April - May Root Stock: BA29 High yielding, drought tolerant. QUC Dwarf				
Pear Beurre Bosc (Brown Beurre) Superb quality eating brown pear with sweet, juicy large fruit. Regular heavy cropper. March - April <i>HARVEST - MARCH-APRIL</i>	45L	2.4m		Puhinui
Pear Conference A long necked green fruit with some russeting and good juicy flavour <i>HARVEST - MARCH-APRIL - PARTIALLY SELF FERTILE.</i>	45L	2.5m		Puhinui
Pear Dbl William Bon / Confer WILLIAM B.C: Also known as the Bartlett pear. Large long necked, green - yellow fruit, ideal fresh or bottled. CONFERENCE: A long necked green fruit with some russeting and good juicy flavour.	45L	2.3m		Puhinui
Pear Packham's Triumph Medium to large light yellow green Pear. White, firm, very juicy smooth textured. Excellent storage qualities. Pollinators: Beurre Bosc, William Bon Chretien, Winter Nels, <i>HARVEST - FEB-MARCH-APRIL</i>	45L	2.5m		Puhinui

Species:	Bag	Height	Price	Site
Pear Sekel A heavy cropping, small compact tree with purple autumn foliage. Pears are smaller with reddish brown skin, flesh is creamy white, sweetly juicy with a delicate exceptional flavour. <i>HARVEST - MARCH-APRIL</i>	25L	2.5m		Puhinui
Pear Winter Nelis A very good late eating pear with excellent storage. Small green fruit with reddish russet patches and buttery, rich flavoured flesh. Very hardy, but best in a warm site. Pollinators: Beurre Bosc, William Bon Chretien. <i>HARVEST - APRIL-MAY</i>	45L	2.6m		Puhinui
PERSIMMON (Diospyros kaki) A small attractive tree growing to Apx 5m with large glossy green leaves, stunning autumn foliage colours and fruit that hold onto the tree into winter. Persimmons can be eaten fresh like an apple or sliced with the skin removed but generally have to have aged first on the tree. Can also be dried or made into jam or chutney. Self-fertile, deciduous. <i>DECIDUOUS - SELF FERTILE - HARVEST MAY-JUN - Apx 5m</i>				
Persimmon Fuju The most popular main commercial variety grown. Medium to large deep orange fruit that is Non astringent, sweet and excellent quality. Can be eaten fresh like an apple or sliced with the skin removed, dried or made into jam or chutney <i>DECIDUOUS - SELF FERTILE - HARVEST MAY-JUN - Apx 5m</i>	35L	1.7m		Puhinui
Plum (Prunus spp.) Plums are one of the best stone fruit types to grow in a home garden as prolific crops of very good quality fruit can be produced with very little work. Only a few diseases affect them so a basic spray (or organic) programme will keep the tree healthy and productive. Some are self-fertile or partially self-fertile but most are planted with a pollinator to ensure good fruit production. Plum Root Stock Myrobalan - Vigorous and tolerant of variable soils				
Plum	400L	3.0m		Puhinui
Plum Billington's Early Early, European plum with smallish dark purple fruit. Flesh is yellow green with a rich, sweet flavour. Mostly self-fertile but can be planted with English Greengage to improve pollination. Pollinators: Santa Rosa, Black Doris, Greengage <i>PURPLE SKIN, YELLOW FLESH - HARVEST DEC-JAN - PARTIALLY SELF FERTILE</i>	45L	2.5m		Puhinui
Plum Black Amber Super large beautiful, black plum with juicy, amber flesh. Superb eating fresh or in pies, puddings and sauces. Pollinators: Santa Rosa, Satsuma. <i>BLACK SKIN, AMBER FLESH - HARVEST JAN -- PARTIALLY SELF FERTILE</i>	45L	2.5m		Puhinui

Species:	Bag	Height	Price	Site
Plum Burbank Medium sized plum, roundish bright red mottled yellow skin. Deep yellow flesh of very good flavour. Tolerates more cold than other varieties. Pollinators: Omega, Sultan <i>RED YELLOW SKIN, YELLOW FLESH – HARVEST FEB - PARTIALLY SELF FERTILE</i>	45L	2.0m		Puhinui
Plum DbI Black Doris / Billington Black Doris - Purple black skin - Dark red flesh Billington - Dark red skin – Dark red flesh	45L	2.5m		Puhinui
Plum DbI Black Doris / Santa Rosa Black Doris - Purple black skin - Dark red flesh Santa Rosa - Purple skin – Pink yellow flesh	35L (Low Graft)	2.2m		Puhinui
Plum Elephant Heart A large dark red / purple skin, with purple / red sweet juicy flesh FREESTONE good for eating and preserving. Pollinators: Omega, Santa Rosa, Sultan <i>PURPLE SKIN, PURPLE RED FLESH – HARVEST FEB</i>	45L	2.2m		Puhinui
Plum Fortune Large plum with attractive bright red over green-yellow skin, yellow flesh with slight tinge of red under the skin, sweet aromatic flavour. Freestone. Good storage. Uni formly round fruit, some weighing 200g. Pollinator: Santa Rosa <i>RED GREEN YELLOW SKIN, YELLOW FLESH – HARVEST JAN-FEB</i>	45L	2.5m		Puhinui
Plum Hawera A very popular New Zealand variety. Large, very dark red skin with firm red flesh. Freestone, sweet and juicy. <i>DARK RED SKIN, RED FLESH – HARVEST JAN - SELF FERTILE</i>	45L	2.5m		Puhinui
Plum Luisa Very sweet juicy red skinned, yellow fleshed plum. Large size with unusual heart shape. Easy to grow and great for the home garden. Pollinators: Freedom or Billington. <i>RED SKIN, YELLOW FLESH – HARVEST FEB</i>	45L	2.5m		Puhinui
Plum Omega Medium sized rounded fruit has a green and red speckled skin with red flesh. Very juicy with a sweet flavour. An excellent all purpose fruit for eating and bottling. Reliable heavy bearer. Pollinators: Billington, Burbank, Elephant Heart, Santa Rosa, Sultan. <i>GREEN RED SPECKLED SKIN, RED FLESH – HARVEST FEB-MAR - PARTIALLY SELF FERTILE</i>	45L	2.0m		Puhinui
Plum Purple King Very large, purple skinned fruit with yellow flesh. Sweet and juicy. Well suited to warmer areas. Pollinators: Billington, Elephant Heart, Omega, Santa Rosa, Sultan, Wilsons Early. <i>PURPLE SKIN, YELLOW FLESH – HARVEST JAN</i>	45L	2.8m		Puhinui

Species:	Bag	Height	Price	Site
Plum Santa Rosa The Queen of Plums! Among the highest of flavoured plums in the world. Medium to large purple skinned fruit, with yellow tinged pink, juicy, tangy flesh. <i>PURPLE SKIN, YELLOW PINK FLESH – HARVEST DEC-JAN - SELF FERTILE</i>	45L	2.4m		Puhinui
Plum Sultan Large dark red skin and flesh. Juicy and highly flavoured. Excellent for eating, jams, sauces and bottling. A small spreading tree that bears reliably. Pollinators. Burbank, Elephant Heart, Omega, Santa Rosa. <i>RED SKIN AND FLESH – HARVEST JAN-FEB</i>	45L	2.2m		Puhinui
Plum Tpl Omega / Black Doris / Santa Rosa Omega - Green red speckled skin - Red flesh Black Doris - Purple black skin - Dark red flesh Santa Rosa - Purple skin – Pink yellow flesh	45L	2.2m		Puhinui
Plum Wilsons Early Good early variety with smaller yellow skinned fruit overlaid with red. Yellow flesh. Pollinators: Billington, Black Doris, Burbank, Omega, and Santa Rosa. <i>YELLOW SKIN AND FLESH – HARVEST DEC - PARTIALLY SELF FERTILE</i>	45L	2.5m		Puhinui
Plumcot Spring Satin A plum-apricot cross, which combines the plum flavour with the sweetness of apricot. The large reddishblack skinned fruit has golden flesh that is very sweet and flavoursome. An early season variety. Cross pollinates with any Japanese plum flowering at the same time, including Santa Rosa.	45L	1.7m		Puhinui
Pomegranate granatum Small tree producing the best known pomegranate with quantities of brilliant scarlet red, carnation like flowers. Fruit are purple red with deep crimson juicy flesh. Prefers full sun. <i>DECIDUOUS - HARVEST FEB-APR</i>	25L	1.0m		Puhinui
PRUNE (Prunus spp) Prunes are European plums that flower later than Japanese plums. They have higher sugar levels and are typically oval in shape. Can be eaten fresh or preserved or dried. Trees are hardy and resistant to most bacterial disease. Most are Self-fertile but will set heavier crops if cross pollinated.				
Prune Cacak Fruitful Oval medium to large fruit with a pink to dark purple grey bloom. Yellow flesh. Good Flavour. Eat either fresh or dried. Regular cropper. <i>HARVEST FEB – MAR</i>	45L	2.4m		Puhinui
Prune Crowes Large oval shaped plum prune with dark orange red skin and firm sweet golden flesh. Ripens mid -season. Freestone. Self-fertile. <i>FREESTONE - SELF FERTILE – HARVEST LATE FEB</i>	45L	2.4m		Puhinui

Species:	Bag	Height	Price	Site
Prune Stanley A larger spreading tree which fruits heavily from a younger age. Fruit are large, oblong with purple blue skin and green yellow flesh. <i>HARVEST LATE FEB - SELF FERTILE</i>	45L	2.5m		Puhinui
Quince smyrna Smyrna: A popular selection from Turkey. Fruit is large to very large, furrowed, oblong/ pear shaped, golden yellow and very aromatic. Flesh is mild, tender, light yellow and is of excellent quality. Fruit keeps very well.	45L	2.3m		Puhinui
WALNUT (Juglans spp) Walnuts are fast growing to a medium to large sized trees with a characteristically round heads. Seeds produced are hard woody shells which contain the edible "walnut" flesh. High in beneficial Omega 3 oils				
Walnut Nigra The Black Walnut as a larger growing walnut than the English which still produces edible nuts, but after more years. Also valued for its timber	45L	1.7m		Puhinui
Walnut Regia The English walnut has Long been valued for its edible nuts that have both medicinal as well as culinary uses. Apx 12m	45L	1.8m		Puhinui
CITRUS				
General Care <ul style="list-style-type: none"> • Planting site-sunny sheltered & frost free position in deep well drained soil • Citrus are excellent for coastal areas, but will grow inland where winters are mild • All citrus are E vergreen. • Prune to shape and allow sunlight & wind movement. • Rootstock growth needs to be removed. • Citrus are 'gross feeders' so require regular fertilizing. • Keep well -watered when fruit is developing • Fruit can be left on the tree, but watch for over ripening. • Citrus are self-fertile • Fruit are best cut, not pulled, from the tree. • Generally grow to 3 - 4m 				
Root Stock Citrus All Tri foliata rootstock, which provides some resistance to disease, increase to cold hardiness and high quality fruit				
Grapefruit (Citrus x paradisi)				
Grapefruit Cutlers Red A much sweeter grapefruit with a thick rind that colours to an attractive deep orange at maturity. Flesh orange yellow colour Like most grape fruit, it tends to be biennial bearing i.e. it has its heaviest crops second year. <i>HARVEST JUL-SEP.</i>				
	15L	80cm		Puhinui
	25L	1.2m		Puhinui

Species:	Bag	Height	Price	Site
Grapefruit Golden Special				
NZ's Major commercial variety. Medium to large, thin-skinned fruit, very juicy with a tangy flavour. The flesh is fine-grained, richly coloured & comparatively seedless unless cross-pollinated by neighbouring citrus. Heavily bearing once established. Generally Ripens July -November, but the season can stretch. <i>HARVEST – JUL-NOV</i>				
	15L	80cm		Puhinui
	35L	1.2m		Puhinui
Grapefruit Star Ruby				
Smooth yellow orange skin with a blush of rose. Flesh a rich ruby colour laden with juice. Excellent mild flavour perfectly sweet-tart. <i>HARVEST – JUL-NOV – Apx 3 X 3m</i>				
	25L	70cm		Puhinui
	45L	1.0m		Puhinui
Kumquat Meiwa				
Small, rounded, brightly coloured fruit that resemble miniature oranges. Eat fresh or use for candied fruit or marmalade. It is the sweetest flavoured Kumquat, with larger fruit than most & more cold resistant. Fruits for several months in winter, and holds well on the tree. Ripens in winter. (Apx 1.5m)				
	15L (70cm Std)	1.0m		Puhinui
Lemon (Citrus x Limon)				
Lemon Genoa				
A Eureka type, well -suited to most home gardens as the tree is typically smaller than most other lemons. Bears heavily from an early age, producing large, greenish-yellow, very juicy fruit with low seed count. Also known as Genova or Italian Lemon. May bear fruit anytime of the year. <i>HARVEST – APR-JUL</i>				
	15L	80cm		Puhinui
Lemon Meyer				
One of the most popular. Low spreading growth habit with few thorns. Large fruit with smooth skin and lower acid level than other lemon varieties. Very high juice content. Plant in warm sheltered position and rich well - drained moist soil in full sun Feed regularly during growing season and water well in summer. Mulch with well-rotted compost. Good in containers. <i>HARVEST – APR-JUL.</i>				
	15L	1.0m		Puhinui
	15L (1.0m Std)	1.4m		Puhinui
Lime (Citrus aurantifolia)				
Lime Bears				
Probably a selection of Tahiti, with larger, more attractive fruit and heavier crops. They are seedless (unless cross-pollinated by neighbouring seedy citrus), tangy & very juicy. Deep green fruit turn lime -yellow at maturity. Thin skinned. Reasonably tolerant of cold and has a mid-sized, vigorous, broad-spreading habit. <i>HARVEST – MAY-AUG</i>				
	15L (1.0m Std)	1.4m		Puhinui
	35L	90cm		Puhinui
	80L (1m Std)	1.5m		Puhinui

Species:	Bag	Height	Price	Site
Lime Kusiae An vigorous smaller growing, bushy lime. Small fruit is yellow when ripe and has an intense lime flavour. Can also be picked when green. The main crop is over summer and then continues throughout the year. <i>Cold Hardy (Apx 2m)</i>	15L 25L	60cm 1.0m		Puhinui Puhinui
Lime Mandarin Lime Mandarin limes are not true limes but a very tart, sour mandarin with lime like flavour. Used commonly as lime substitutes but much hardier and more vigorous growth. Both the skin and the pulp is orange which easily breaks into segments. Excellent for marmalade. <i>HARVEST – JUN-OCT</i>	25L	1.0m		Puhinui
Mandarin (Citrus reticulata) Mandarin Clementine	15L 25L (0.5m Std) 45L (0.9m Std)	80cm 1.0m 1.3m		Puhinui Puhinui Puhinui
Satsuma (Citrus unshiu) Are slow growing, hardy trees with an open, almost weeping habit of growth. The flowers are intensely fragrant. The fruit ripens in autumn/winter and can be picked as soon as they colour. They are very flat in shape with a thick, loose, easily peeled skin. The flesh is light orange, juicy, seedless (unless cross - pollinated by neighbouring seedy citrus) with a sweet mild flavour. This makes them a favourite with children. As a group, Satsuma's are relatively cold hardy and an excellent choice for smaller home gardens they only grow apx 2.5-3.0m tall.				
Mandarin Satsuma A slow growing, hardy tree with an open, almost weeping habit of growth. Fragrant flowers are followed by autumn/winter fruit that can be picked as soon as they colour. They are very flat in shape with a thick, loose, easily peeled skin. The flesh is light orange, juicy, seedless (unless cross -pollinated by neighbouring seedy citrus) with a sweet mild flavour. <i>APX 2.5-3.0m tall.</i>	45L	70cm		Puhinui
Mandarin Satsuma Kawano A distinctly large, more robust tree than other Satsuma's. Fruit is easy peel and seedless with good flavour. Heavy cropping. The latest ripening of the satsuma group. An excellent home garden choice <i>HARVEST – JUL-AUG</i>	15L	50cm		Puhinui
Mandarin Satsuma Miho Small to moderate, slow growing tree with dense, upright growth habit. Heavy crops of quite large, juicy, mild flavoured seedless fruit. Earliest ripening of the satsuma group. Well suited to growing in containers <i>HARVEST – MAY-JUL</i>	15L (90cm Std)	1.3m		Puhinui
Mandarin Satsuma Miyagawa The main Satsuma in Japan. Large fruit with smooth skin, easy peel. Early fruiting <i>HARVEST – MAY-JUL</i>	25L	60cm		Puhinui

Species:	Bag	Height	Price	Site
Mandarin Satsuma Silverhill				
The best known of the satsuma group. Tree is very cold tolerant, with a spreading habit. Medium-large, round, flat fruit, with thick, easy-peel skin. The segmented flesh is juicy and mild flavoured.				
<i>HARVEST – MAY-JUL</i>				
	15L (90cm Std)	1.3m		Puhinui
	35L (0.8m Std)	1.4m		Puhinui
Orange (Citrus sinensis)				
Sweet oranges were mentioned in Chinese literature in 314 BC. range trees are of the most cultivated fruit tree in the world. Orange trees are widely grown in tropical and subtropical climates for their sweet fruit. The fruit of the orange tree can be eaten fresh, or processed for its juice or fragrant peel.				
Orange Carters Navel				
Moderately vigorous, upright tree which is an offspring of Washington Navel. Similar in most respects, but ripening a little earlier in the season. Medium-large, smooth skin flesh is firm, juicy and seedless with excellent flavour. It is also slightly easier to peel				
<i>HARVEST JUL-SEP - SEEDLESS</i>				
	15L	60cm		Puhinui
Orange Harwood Late				
A rounded, bushy, high yielding tree of moderate vigour. The fruit is mid-sized & richly flavoured with high juice content. It holds well on the tree & can be picked at almost any time of the year. Few seeds.				
<i>HARVEST NOV-FEB</i>				
	25L	70cm		Puhinui
Orange Navelina				
An attractive high yielding fruit with a more oval shape. Early to mature with good flavour and deep orange colour. Vigorous grower.				
<i>HARVEST JUL-AUG</i>				
	15L	60cm		Puhinui
Orange Newhall Navel				
A vigorous growing navel orange. A good seedless eating and juicing orange.				
<i>HARVEST – AUG-SEP - SEEDLESS</i>				
	15L (80cm Std)	1.3m		Puhinui
Orange Parent Navel				
Navel. Large, Quality, seedless fruit that hold well on the tree until later in the season. The fruit may be sweeter & larger than other navels, but can be more difficult to peel. Moderately vigorous with a rounded habit of growth.				
<i>HARVEST - JUL-OCT. - SEEDLESS</i>				
	15L	60cm		Puhinui
	400L	2 x 2m		Puhinui
Orange Valencia				
A top eating orange with tender, juicy, high quality flesh with few seeds. The thin skinned fruit holds well on the tree and is ripe from late spring through to summer. Crops well. Used extensively for fruit juice production through-out the world.				
<i>HARVEST – NOV-JAN</i>				
	25L	70cm		Puhinui

Species:	Bag	Height	Price	Site
Tangelo (Citrus tangelo)				
Tangelo Seminole				
Hybrid of Grapefruit and Tangerine. Yields high amounts of red orange fruit that is semi-flat and thin skinned. Flesh is sweet, very juicy and is almost seedless. Ripens during July-October. <i>APX 2.5 x 2.0</i>				
	15L (1.0m Std)	1.5m		Puhinui
	25L	90cm		Puhinui

Tangor (Citrus nobilis)				
Tangor Dweet				
Ripens late July-early September. Medium to large fruit with a distinctive neck & attractive rind colour. Good crops of evenly sized fruit that are easy-peel, very juicy & of good flavour. Easily segmented, with few seeds (usually only 3-4 per fruit).				
	15L	80cm		Puhinui
	25L	1.0m		Puhinui

Tangor Kiyomi				
An attractive tree, with large leaves and a slightly weeping habit. The fruit are a cross between an orange and a satsuma mandarin. Easy peel, sweet juicy and seedless. Ripens August -October <i>ApX 2.0 x 1.5m after 8 years</i>				
	15L	60cm		Puhinui
	15L (1.0m Std)	1.5m		Puhinui
	25L	70cm		Puhinui
	35L (90cm Std)	1.3m		Puhinui

Tangor Ugli				
Ripens late October-December. An unfortunate name for one of the most delicious of all citrus! The fruit are very large & thick-skinned with sweet, deep orange flesh – pleasant to eat, with a distinctive flavour. Easy peel.				
	25L	1.0m		Puhinui

HARDWARE & ROOT CONTROL

ROOT DIRECTORS

ROOT DIRECTOR - RD 640

These one piece root control planters are installed when the tree is planted. The tapered sides and vertical ribs direct the tree roots down away from pavement and out for anchorage. **Root Directors** also have optional water vents to convey water rapidly to root zone.

These products are a complete system for tree care as they also have provision for supporting stakes, and the top section is specially strengthened for mounting above-ground guards also. Phone us for a complete information package. Top opening size is 580mm. The **RD640** accommodates trees with a mature trunk diameter up to 300mm \$190.00 + GST per/ea

ROOT DIRECTOR - RD 1000

The **1000** is designed for trees with a larger root ball and a larger mature trunk diameter.

This model has all the same features as the **RD640** but with an opening size of 960mm. \$356.00 + GST per/ea

 **Quantity discounts available.**

Please enquire.

NOW AVAILABLE - Ultra Tree Grate - Please phone for information.

ROOT - STOP LINEAR BARRIER

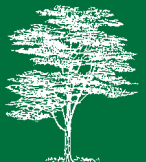

R.S. 500 - 0.5 metre wide = \$240.00 + GST per roll (50m)
or \$7.20 + GST per metre

R.S. 1000 - 1.0 metre wide = \$480.00 + GST per roll (50m)
or \$14.40 + GST per metre

- * Heavy Duty
- * Ultra durable high-density polyethylene
- * Good rigidity for easy installation

Phone now for more information or to enquire about our extensive range of tree care products, including Sentree trunk protectors, Arborguy tree ties, Wooden and Bamboo stakes, Fertilizers, and much more.
